USER MANUAL

Super Brightness   Plug and Play   1:1 Replacement

Confirm the correct bulb size you need

1. Please check your stock bulbs to confirm the correct bulb size. The part number is marked on the bulb.

2. If you have already changed the bulb before, please check your owner's manual or search "automotive bulb look-up" online to confirm the correct bulb size.

1 CHECK YOUR ORIGINAL BULB

If the bulbs do not light up after installed

1. You can directly use 12V or 24V DC voltage to test whether the bulbs can light up.

2. Try swapping the positions of the two bulbs.

3. Reinstall the halogen lamp to test whether the original plug is damaged.

If you have tried the above steps and the bulbs still do not light up, please contact us directly through Amazon or our Support E-mail: support @ auxlight.net

Other things to note

1. This type led bulbs are not recommended to be used as headlight, only for Fog Light, Daytime Running Light/ DRL.

1. 2. A resistor or decoder may be required for vehicles equipped with CAN-BUS system to bypass the error code.
